

**EN.Y.RON XL-MOBILE SERVICE VAN**

**Features of XL-MSV**

Enyron Premium Mobile Service Van Model XL-MSV, is a multipurpose vehicle used for maintenance and repair of construction and mining equipment at site. It gives the benefit of on-site repairs/maintenance without wasting any time bringing the equipment or vehicles to the workshop. XL-MSV can be easily fabricated on any suitable LCV / HCV available in the market.

The Enyron Service Mobile Van Model XL-MSV is fully equipped with an oil dispensing system, tools, small equipment, and other utilities such as oil pumps, grease pumps, air compressor, grinding machine, drilling machine, welding machine, washing pump, cutting set, lights etc. As power is generated using either Compressor or DG Set or PTO

- Ergonomic open type cabin design for better ventilation, good visibility and easy access for replenishing/ replacing entities.
- Separate storage space for fresh and used lubricants, tools, spares, and filters.
- Digital lube oil dispensing guns to keep a record of usage.
- Engraved tool trays for ease of operation and visual control.
- A pneumatic line runs across the cabin with 1 pneumatic pillar each at 4 corners.
- Collapsible jib and Floor rail with trolley for loading and movement of assemblies/material within the van.
- Working bench for small repairs.
- Waste oil transfer and storage tanks.
- Inbuilt water tank for storage of water with washing pump for pressurized cleaning of equipment
- Modular magnetic base rechargeable LED lights for working at night.
- Complete tooling and equipment of reputed International and Indian brands.
